SUMMARY

Full Stack Engineer with 5+ years of experience building scalable production-grade applications using Java, Spring Boot, REST APIs, Microservices, PostgreSQL, React, Node.js, and AWS across healthcare and insurance domains. Built healthcare claims and medical coding automation workflows that increased CPT code automation by 91% and improved claim turnaround time by 94%. Experienced in Agile delivery, CI/CD, Docker, Terraform, performance tuning, observability, monitoring, and AI-powered applications using RAG and agentic frameworks.

TECHNICAL SKILLS

Backend: Java, Spring Boot, REST APIs, Microservices, Node.js, Express.js, Kafka, Hibernate, Maven, Data Structures and Algorithms

Frontend: React, Angular, JavaScript, TypeScript, HTML, CSS, RxJS, NgRx, Redux

AI / LLM: OpenAI API, Ollama, Retrieval Augmented Generation (RAG), LangChain, LangGraph, AI Agentic Frameworks, Embeddings, Vector Databases (Weaviate), GitHub Copilot

Cloud / DevOps: AWS, EC2, ECS, EKS, S3, RDS, Docker, Kubernetes, Terraform, CI/CD, GitHub Actions, Jenkins, Git

Databases / Workflow: PostgreSQL, MySQL, SQL Server, MongoDB, SQL, BPMN, Camunda

Testing / Engineering: JUnit, Jest, Cypress, Unit Testing, Integration Testing, Regression Testing, Load Testing, Disaster Recovery, System Design, Security, Root Cause Analysis, Performance Tuning, Observability, Monitoring, Grafana, Prometheus, Code Reviews, Agile

WORK EXPERIENCE

State University of New York at New Paltz

New Paltz, NY

Teaching & Research Assistant

Aug 2025 – May 2026

- Engineered an AI-powered Student Advisor Application using React, Node.js, LangChain, and RAG, reducing course recommendation time by 75% and manual advising errors by 80%.
- Built backend retrieval pipelines processing academic transcripts, generating embeddings, and retrieving curriculum context from Weaviate vector databases to reduce hallucinations and improve response reliability.
- Developed natural-language workflows using OpenAI APIs and Ollama LLMs to support course eligibility queries and context-aware academic recommendations.
- Applied agentic AI concepts and structured retrieval workflows to build maintainable AI-driven application capabilities for professors and students.

Athenahealth

Chennai, India

Senior Software Engineer, Full Stack Developer

Feb 2022 – Dec 2024

- Developed scalable healthcare applications and backend services using Java Spring Boot, REST APIs, React, Node.js, PostgreSQL, and AWS for medical coding and claims processing workflows.
- Built and integrated microservices-based IAG-Engine automation workflows, increasing CPT code automation and claim resolution rates by 91% while improving turnaround time by 94%.
- Implemented rule-driven API integrations to auto-populate patient questionnaires and generate CPT recommendations from structured medical records, reducing manual intervention for coders.
- Architected auditor feedback and validation workflows that improved coding accuracy, enabled maintainable review pipelines, and reduced operational processing delays.
- Applied performance tuning, root cause analysis, security, observability, and production troubleshooting while collaborating with engineers, product teams, and stakeholders in Agile delivery cycles.
- Contributed to CI/CD pipelines using Jenkins and GitHub Actions to automate build, testing, and deployment workflows, improving release reliability.

Chubb

Hyderabad, India

Software Engineer, Full Stack Developer

May 2021 – Feb 2022

- Developed scalable insurance portal applications using Angular, Java Spring Boot, and REST APIs, enabling reusable onboarding workflows across APAC product lines.
- Assumed frontend ownership during a critical team transition, ensuring uninterrupted sprint delivery and contributing reusable UI components to the CRUX organization-wide component library.
- Built maintainable frontend modules and backend integrations supporting scalable digital insurance products across regional deployments.
- Mentored a junior intern through onboarding, development tasks, code reviews, and collaborative problem solving while maintaining sprint delivery commitments.

Cognizant

Chennai, India

Junior Software Engineer, Full Stack Developer

July 2019 – May 2021

- Built full stack features for a flight management portal using Angular, Java Spring Boot, PostgreSQL, and REST APIs supporting scheduling and booking workflows.
- Optimized backend batch processing pipelines by identifying performance bottlenecks and refactoring execution flows, reducing batch runtime by 83%.
- Redesigned frontend data rendering and API response contracts to eliminate over-fetching, reducing page load time from 30 seconds to under 1 second.
- Collaborated on a Google Dialogflow NLP proof of concept automating customer inquiry workflows and improving response turnaround efficiency.

EDUCATION

State University of New York at New Paltz

New Paltz, NY

Master of Science in Computer Science — GPA: 3.93/4

Jan 2025 – May 2026

Thiagarajar College of Engineering

Tamil Nadu, India

Bachelor of Technology in Information Technology — GPA: 3.26/4

July 2015 – April 2019
